*This is Reg's comment
on my paper
"The Significance of Place"*

Note: Jay,

I apologize for not commenting earlier, before you went to press (which I assume has occurred), but I've been swamped with work. **However, I wouldn't have you change a word.**

Many thanks for sharing your very thoughtful ... and concise (smile) --- draft article with me. **I truly wish more developers had your practical creativity and sensitivity to design and "place."**

I'll be away for the remainder of this month, but we'll definitely, have lunch in early November at your convenience.

Regards, Reg
